

# EDGE TRM516 WHEELED TROMMEL

*Trommel screen drum dimensions: 5'X16"*

*Highly efficient maintenance friendly hydraulic drive system*

*Low power consumption: 3-4 US Gallons*

*Improved fuel efficiency with eco-power saving functionality*

*Innovative design of feeder conveyor allows for the easy removal of trommel drum and mesh exchange*

*Radial fines conveyor for huge wind row stockpiling capacities*

*Capable of working in the most extreme conditions and environments*

*Intelligent load sensing to prevent drum overload*

The EDGE Innovate TRM516 trommel screen range has been designed for mid to large scale operations that may be constrained for space. Designed with durability in mind, the robust TRM516 trommel screen has proven capabilities in the recycling, composting and construction & demolition industries.

Thanks to design features such as the 4.9m (16') long barrel, variable speed control and a feed conveyor with intelligent load sensing controls; the EDGE TRM516 trommel screen is able to produce top-quality fine materials such as compost, gravel, sand and topsoil with ease. Various mesh sizes and drum types are available for optimum screening performance.

By engineering a compact trommel with a radial discharge conveyor, the TRM516 mobile trommel has been able to maintain all the benefits of a side conveyor product with all the advantages of an end conveyor offering.

## APPLICATIONS

Biomass  
C&D Waste  
Compost  
MSW  
Mulch  
Sand and gravel  
Topsoil

## OPTIONS

Tipping grid  
Punch Plate Drum / Mesh Drum / Spiral Drum  
Extra drums  
Reversible fan  
Over-band magnet  
Hydraulic blowers / air knives  
Extended hopper / greedy boards  
Heavy duty / chevron belts  
Available without radial fines and oversize discharge conveyors  
Magnetic head

- WEIGHT 20.3 UST
- TRANSPORT WIDTH 7'7"
- TRANSPORT LGTH 51'
- TRANSPORT HT 13'1"
- WORKING WDTH 7'7"
- WORKING LGTH 76'9"
- WORKING HTS 17'6"
